(Open to Remote / Relocation)

SUMMARY

Computer Science graduate (2026) specializing in AI/ML engineering and full-stack development. Built production-oriented projects: an offline custom-AI investigation platform for Kerala Police, a real-time IoT safety platform, and a full-stack mobile app with hardware integration. Proficient across the AI/ML stack — from NLP pipelines and LLM integration to FastAPI backends and React frontends.

SKILLS

AI / ML: LLMs, RAG Pipelines, PyTorch, NLP, Scikit-learn, ANN/Deep Learning, HuggingFace Transformers, Generative AI, Prompt Engineering

Languages: Python, JavaScript, TypeScript, Java, C

Backend: FastAPI, Node.js, Express.js, REST APIs

Frontend / Mobile: React, React Native, HTML, CSS

Cloud & Data: Firebase, MongoDB, Git/GitHub, Google Colab

Hardware / IoT: ESP32, GPS, IMU, BLE, WebSocket

PROJECTS

FirAI — Kerala Police AI Investigation Assistant *Python · PyTorch · FastAPI · React · PostgreSQL*

- Built a 100% custom AI engine (BiLSTM + Attention, PyTorch): 98.8% crime classification accuracy, under 100ms CPU inference, 3.3MB model — no third-party AI APIs, fully offline.
- Custom NER, TextRank summarization, TF-IDF legal mapping, and multilingual similarity search; full stack: FastAPI, React, PostgreSQL, Docker.

Real-Time IoT Safety Monitoring Platform *React Native · Firebase · ESP32 · GPS · IMU · WebSocket · BLE*

- End-to-end IoT system: custom ESP32 firmware reads GPS and IMU sensor data and streams to a cross-platform mobile app via BLE/WebSocket.
- Accident detection via motion threshold logic triggers automated SOS alerts; Firebase provides real-time cloud sync for remote monitoring.

Disease Diagnosis Prediction — ANN *Python · Scikit-learn · Pandas · NumPy*

- Trained multi-layer ANN on medical dataset with full preprocessing pipeline; achieved 98%+ test accuracy evaluated via confusion matrix, F1, precision, recall.

EXPERIENCE

Freelance Web Developer · Sea Shark — UAE Client (Remote)

2026 – Present

- Designed and built a responsive business website for a UAE-based client using TypeScript and React — owning requirements, revisions, and delivery independently across time zones.

Campus Lead · GTech µLearn (Kerala Gov-backed student dev community)

2025 – 2026

- Scaled campus chapter participation by 40%; organized 10+ workshops on AI, Web Development, and Cybersecurity reaching 100+ students per semester.

EDUCATION

B.Tech — Computer Science & Engineering

2022 – 2026

APJ Abdul Kalam Technological University, Kerala, India

CERTIFICATIONS

Azure AI Fundamentals (AZ-900) · Google GenAI & LLMs · ML & AI Internship, ICT Academy of Kerala

2024
